LinkedIn: <https://www.linkedin.com/in/mdrahmann/>

Full UK Work Rights (HPI Visa) | Immediate Availability

PROFESSIONAL SUMMARY

Founder & E-Commerce Operations professional with hands-on experience building, launching, and managing a Shopify-powered multi-brand fashion marketplace. Proven track record in end-to-end platform operations, catalogue management, SEO, vendor relations, and stakeholder coordination — all fully aligned with my LinkedIn profile. Combines practical e-commerce delivery with client-facing sales & marketing support, plus a solid technical project coordination background. Seeking an E-Commerce Operations & Partnership Coordinator role to apply my verified experience supporting platform performance, partner growth, and UK market expansion.

CORE COMPETENCIES

E-Commerce Operations: Shopify platform launch & management; Multi-vendor catalogue & data integrity; SEO & organic search optimisation; Site performance & conversion monitoring

Partnership & Growth: Client relations & sales support; Product demonstrations & onboarding; Stakeholder communication; Marketing engagement & acquisition

Technical & Project: Agile project coordination; Cross-functional liaison; Requirements gathering & documentation; Software development lifecycle

PROFESSIONAL EXPERIENCE

E-Commerce Operations & Management — JARINE FASHION LONDON

Founder & Product Manager | London, UK | 2026 – Present

- Founded JARINE, a London-based premium multi-brand fashion marketplace; conceptualised and designed end-to-end product strategy for an AI-driven shopping experience with virtual try-on functionality
- Designed complete user journey, UI/UX wireframes, and platform features, translating complex AI product vision into a working application
- Launched and scaled the multi-brand architecture on Shopify; owned the full product lifecycle from concept to live deployment
- Structured multi-vendor catalogue data models, ensuring precision across product attributes, tiered pricing, and media assets
- Built technical SEO framework from scratch using Google Search Console to improve organic ranking for premium fashion keywords
- Monitored site quality, checkout metrics, and vendor API performance; identified friction points to enhance user experience and conversion

Sales & Marketing Representative — Moomoo Technology

2024

- Delivered customer-focused platform guidance and product demonstrations to clients
- Assisted users with onboarding, account setup, and platform navigation
- Collaborated with sales and marketing teams to boost customer engagement and acquisition
- Promoted digital products and supported performance targets
- Built strong client relationships through clear communication and personalised support
- Collected user feedback and contributed to service improvement initiatives

PROFESSIONAL EXPERIENCE — CONTINUED

Software Engineer & Project Coordination — SolverCircle

2014 - 2020

- Investigated and triaged technical and customer-reported issues; acted as liaison between customers, engineering, product, and research teams
- Gathered business requirements, translated needs into technical specifications, and supported customer onboarding and demonstrations
- Coordinated implementation and post-deployment activities; produced technical documentation and managed concurrent deliverables
- Participated in Agile ceremonies and mentored junior team members on technical standards and processes
- Developed web applications and system designs; used project management tools (Miro, LeanKit, Trello, Git) to organise delivery workflows
- Programmed and tested IoT devices; authored detailed technical documentation to guide development and onboarding
